

Eos Celtic Harp

36 string Celtic Harp

Eos is the Welsh word for "nightingale"

- **Exceptionally warm and clear sound**
- **Traditional craftsmanship**
- **Similar string spacing and tension to a concert harp**
- **Positive solid brass and hardened steel semi-tone levers**
- **Made from the finest hand-selected materials**
- **Available in Black Walnut and Cherry woods**
- **Other woods, personalisation and decoration available to order**
- **Stand available to order for raised playing height.**

This harp has been designed to offer exceptional volume and clarity of sound as well as structural stability. With the same string tension and spacing of a concert harp, the Eos is ideal for harpists who want the sound quality of a concert harp with all the convenience of a lever harp.

Height: 51¾ inches (1315mm)

Soundboard width: 16 inches (410mm)

Extreme width: 30½ inches (775mm)

Strings: 36 - 1st octave C to 6th octave C

Weight: 15kg (34lbs)

Available: in either Cherry (light wood) or Black Walnut (darker wood). Colours available to order.

"Telynau Teifi lever harps have the biggest, richest possible sound! You have to hear one to understand what the difference is between their Eos model and a traditional lever harp."

Danielle Perrett, One of the UK's leading harpists and renowned recitalists

Teifi Harps speak for themselves. They have a truly distinctive sound - huge, rich and warm, with a clear, ringing treble. Harpists are delighted with the responsiveness of the instrument, and the clarity and depth of sound that can be achieved with our harps.
